

## Meat Dicing Machine

Main features:

- Making the meat material push rod promoting the speed of change to achieve different cut thickness requirements by adjusting cutting thickness knob.
- Ensuring consistent product in the cutting process by adjusting pre-load knob.
- Reducing extrusion to product in the process of cutting using single cutting edge by adjusting putting the meat to feed stepper motor .
- Using the activity side of the pressure to facilitate feeding and improve work efficiency on one side of slot

Raw material rated temperature 0to 4degrees Celsius  
this machine can precisely cut meat into dice,shred,slice,strip

Model	Capacity (kg/h)	Voltage(v )	Cutting Slot Size(mm)	Power(kw)	Size(mm)
QD350	300-500	380	120x120x350	3	1230x920x920
QD550	600-800	380	120x120x350	3	1950x1680x1300
